About the Organizer

Access Solution Industry Association (ASIA) was formed in 2005, in response to Ministry of Manpower (MOM), with a commitment to professional excellence in Singapore's workplace safety and access industry.

With the induction of the new name in 2017, ASIA will focus on togetherness and progression for all trades in access solution. We strongly believe that the future of access industry lies in integration; and ASIA has to become an even more all-embracing association.

ASIA's key industrial thrusts are to enhance productivity, improve standards and promote safety. These values can only be driven by those whose hearts and hands are in the trade.

Synopsis

The long-awaited SS 616:2016 on Code of Practice (CP) for safe use of mobile elevating work platforms (MEWPs) is an uplift to the prerequisites on safety, operation, maintenance, inspection and legislation.

Be it retail, factory or construction. Most commercial or industrious activity will need to use some form of lifting equipment. Technology advancement has helped to create more complex and more powerful machines for people. Even so, the fundamentals are critical and they have to be upheld by every stakeholder.

What we want is to embrace a safe culture where workers return home safely, every day.

Who Should Attend

- Workplace safety and health professionals
- Occupiers, manufacturers and suppliers related to lifting equipment and/or activities
- Environment, health and safety professionals

What You Will Learn

- Overview of the standard and how to ensure safe use of mobile elevating work platforms
- Legislative requirements to adhere to lifting equipment
- Good practices relating to lifting equipment and/ or activities
